

WHAT IS CLAIMED IS:

*Sub B1*  
1. An information reproducing apparatus which plays  
back an information medium in which at least image information  
and control information to control a play back form of the image  
5 information are recorded, comprising:

control means for playing back and controlling the image  
information in a display form according to the control information,  
and for reporting the play back control state, when the control  
information is detected at the time of play back of the information  
10 medium.

2. The information reproducing apparatus according to  
claim 1, wherein the control means stops the play back of the image  
information and reports the play back control state, when the  
15 detected control information is information to stop the play back.

3. The information reproducing apparatus according to  
claim 1, wherein the control means is provided with storing means  
for previously storing report data to report the play back control  
20 state, and reports according to the report data corresponding to  
the control information.

4. The information reproducing apparatus according to  
claim 1, wherein the control information has at least any one piece  
25 of information of play back stop, still image play back, and

automatic play back start of the image information.

*Al*  
*cont*

5. The information reproducing apparatus according to claim 1, wherein the play back control state is displayed in a display form of a superimposition display.

6. The information reproducing apparatus according to claim 1, wherein the control means is provided with detection means for detecting whether a car is stopped or not, and when the detection means detects the state of on-travelling of the car, the control means inhibits the play back display of the image information, and reports the play back control state.

7. The information reproducing apparatus according to claim 6, wherein the information reproducing apparatus is provided with information medium play back means and speed detection means for detecting the present speed of the car, and when the detection means detects the state of on-travelling of the car, the information reproducing apparatus displays and controls the information of the speed detection means, and reports the play back control state.
